Hi Gloria,

I understand that you reached out to members of Council earlier this week with questions about our new stadium. The City of Wichita is getting back to you with one response:

“With the renewed interest in the downtown area of our city, as well as development along our riverfront, Wichita is confident a new Triple-A baseball stadium will revitalize the core of our city even further. This rebirth of the downtown will create an engaging atmosphere and new entertainment district that is anchored by a multi-use stadium that will not only be home to some great baseball, but it will host 200 additional events every year. Since Wichita does not have a Major League team, Triple-A baseball will provide fans with some great action.

All of the materials associated with the stadium are available for the public to view whenever they choose to do so. The materials include a project plan that was presented to Council. Here’s the [link](#). Residents can also find this document online by visiting wichita.gov/stadium, scroll to the bottom of the page, choose “Project Plan” and then choose “STAR Bond Phase 2 Project Plan.”

As for the rest of your questions, the City of Wichita will not speculate on why another team or another stadium is or isn’t successful. We are confident we have made the right decisions for our community and prefer to look forward with optimism.”

Thanks,

Elyse
